

With the constantly changing COVID-19 situation, Willetton Primary School is putting in place plans and processes in the event of a school closure. Staff have been developing contingency plans for the continuation of teaching and learning for students should this occur. To support staff in preparing, we are asking that all students install the following two apps:

1. SnapType: Free Version
2. WebEx Meet

Staff will begin familiarising students with these apps (where appropriate), and the use of Connect, over the coming weeks. These platforms will enable staff to deliver online learning programs to students and classes to stay in touch with each other.

Thank you for understanding and support as we prepare for a number of possibilities moving forward.
