Klepon Classes

In the spirit of celebrating Indonesian Independence Day, students in Years 3, 5 and 6 made *klepon*, a sweet Indonesian snack made of glutinous rice flour, pandan paste, palm sugar and coconut.

Thanks to our wonderful parent helpers, we produced some impressive looking *klepon*! The following week we talked about the taste and texture of the snack and the unique ingredients we used. The activity helped students learn that a key feature of Indonesian language learning was understanding the cultural dimensions – such as food and cooking – that shape and are shaped by the language.
