

Willetton's Got Talent

The Secret Door

Liza stared outside the window, watching the rose her mother was watering. The old rose tree was so clumped to the wall it was as if it was hiding something. But she had checked many times only to find a blank wall made out of bricks. Sometimes Liza felt a strange feeling inside her when she touched it. She had always felt lonely but there was something else she couldn't describe.

The next day Liza woke up to find her mother and father waiting for her outside. They told her to come with them for a walk outside, "We need to talk to you". As they walked along the gates of the palace the king and queen explained that there was a special meeting, inviting all the kings and queens in the world to Chansi Island. They said they would have to go for a month. They would be going on a ship. For some reason, at the same time the queen said the word ship, Liza felt that same strange feeling that she couldn't describe. It didn't really matter to her that her parents would be gone for a month, although they were family they had to be busy doing work in their rooms and the only people she ever met was the servants. It was only after they left that the undescribed feeling seemed to be spelling the word trouble.

Suddenly Liza felt scared. Something wasn't right. She walked past the rose tree thinking about all the possible reasons she felt trouble. After she had walked past it five times she stopped in front of it, tired. She looked at the odd, poking out piece of brick. She had tried pressing it many times before but nothing had happened. She pressed the brick hard this time thinking about her parents, when suddenly the wall parted.

Liza fell onto an oddly shaped pillow. It had a picture of a key on it. As she looked up she saw numerous birds and plants, vines and trees. There were breathtaking flowers blowing gently in the long grass. She was in a forest. In one part of the ground the grass had parted, and in it words were magically being carved into a slab of wood writing

Forest Of The Fairies

Just as she realised she had just fallen through a secret door she noticed footprints. They were small ones, quite like hers. There was only one thing that could mean. There was someone else in the forest. Just as she realised that she heard a sweet voice float through the bush next to her. The voice was coming from where the footprints led to. It was the voice of a girl. She was singing about the moon.

"The sun goes down and the lights turn off but there's still a source of light shining, the sky goes black but the moon comes out and lights the clouds with silver lining," she sang over and over again. Liza thought she sounded friendly and walked over to see who it was.

As she walked over quietly the singing stopped. Then Liza realised that her feet were making a loud rustling noise on the leaves. Whoever it was must have gotten scared. Liza heard footsteps going quickly away. "Wait!" Liza called "I'm a human not an animal." The girl who was running stopped in her steps. She was wearing a similar dress to Liza. She was a princess too! She slowly walked back, explaining how she got here and how the ship with the kings and queens had

been lost. She had the same story as Liza except her door was guarded by an apple tree. Her name was Luna and she loved the moon.

Luna explained that the ship was locked behind another secret door. Luna and Liza quickly became friends. As they walked a long they saw a riddle carved into a tree.

A little blue friend you will find. It will not be your kind. It will lead you to the tree, where you will need to use your key.

Suddenly Liza knew what the riddle meant. The pillow with the picture of the key! She ran back with Luna following her. Just next to the pillow Luna saw a little bluebird. The riddle had said the blue friend would not be our kind! It was a bird! They both ran after the bird and finally reached a door and as they pressed the pillow onto the keyhole, but the door didn't open. Liza sat down panting. After all of that, but still the door didn't open. Then she looked up and realised. The door was not in a tree, it was someone's house.

Just as Liza had finished telling Luna about her discovery the door opened and a short woman with wings flew out. "What's the problem? If you want my bird then take him." The two girls were astonished at what they saw. Then they realised that the bird that flew out of the little house was a much more blue bird than the other one. They took the bird with them. This time they were following the right bird.

They finally arrived at a tree. It was very tall and had a wide trunk. It had oddly shaped leaves that looked familiar. Liza walked around the tree looking for a door. Luna checked the bark for another riddle. But there was nothing. They even searched the ground around it but there was just some grass and dirt.

Luna sat down on the floor and leaned on the tree. The pillow with the key on it brushed against the tree. Suddenly, the tree began to rumble. A door appeared suddenly. The two girls stared. It must be the right door. They pushed on it. First it didn't budge. But then it started to move slowly. Suddenly the door opened, and out came... To be continued

By Dia Year 4

The Entrance

By Reagan Wenn area 12

It was summer holidays at my house and I was playing hockey all by my self. My Dad was out you see. He is very busy working so I do most of the housework, but I don't mind.

So there I was when the ball I was playing with disappeared. For about the hundredth time I went looking for it, I looked under the barbecue, in the pot plants and in the house but I couldn't find it. Finally I looked in the shed. That place really creeps me out. I've heard strange noises from that shed. I decided I didn't want to risk it so I ran inside and carried on reading my myth book. I'm up to a part that tells you of a mystery land full of demons and terrible omens. The last person to go looking for it was explorer Jack Sand who barely made it back alive. He lived seven days before he died of an unknown sickness.

A few minutes later I heard keys in the door and a gruff voice “Elizabeth do you mind letting me in?”

“Of course not Daddy!” I said opening the door wide open and hugged him tight. “Not too tight my dear you'll squash the poor thing” he whispered as he held out a box. “What is it dad?” I asked as I opened it “Oh it's so pretty, I'm calling it Snowy,” I said as a perfect white dog stumbled out of the box and yelped as his bottom hit the cold stone floor.

Over the next couple of days I become braver. Here, I can prove it. One, I'm not scared of storms anymore, Two, I can look after the house without thinking I'm going to get robbed and three I'm not scared of the shed anymore. I've been going in the shed a bit more now to use the gardening tools and the last time I went in I saw a door at the back of the shed. I'm going to inspect tomorrow.

I'm pulling away all the tools from the door and it's really huge. I've brought Snowy along too, just incase. I'm starting to think I've seen this door before and I suddenly realise, it's the same a door that's in my book! I decide to explore. I tell dad that I'm going to a friend's place and I pack a small bag. I take a deep breath and enter the door but what I see is a world of chaos and horror. As soon as I step into that land a massive fireball comes right at me. I take cover in a nearby calm rainforest that looks like it had been recently watered. It was the only part of land that hadn't been burnt or destroyed. It was the most beautiful rainforest I had ever seen. There were hundreds of turquoise flowers framing a soft pebble path that lead into the distance. I followed it until it came to an end at a cave. Inside I set up my bedding and put all my tinned food on a ledge. I figured that I could live for up to two weeks before I would have to find food and leave my safe little cave into the battlefield.....

The Secret Door

By Freya Beveridge. Area 12

Click, click, click, click, click go my wheels as I ride down the driveway. I have been meaning to tell Dad to fix them. Hi. My name is Molly. Most people tell tales about the woods, or get scared about monsters, but let me just tell you that all of that is a heap of lies. Big brothers might tell their younger siblings about it to scare them for fun. Let's just ignore all of that rubbish and get to the good stuff. My favourite place in the whole wide world is the woods. It might be the damp wispy air that flows through. It could be the flora and fauna that overlaps the mossy grass. It could be that old treehouse that Tia and I found last Summer. Whatever it is, it is amazing! So, today was a normal Tuesday when I decided to go exploring in the woods. I do that most days. When I feel upset or angry, I just take a walk and let out all of my feelings. I decide to go to the outer woods, the part that I have not yet explored. "Wow." I breathed to myself as I parked my beat up bike against a tree. The kids at school always teased me because I was different. Especially Lesley Bullfrog the school bully. I called him Bullyfrog as a nickname. So anyway, the outer part of the woods was soo different! There were vines wrapping themselves around the trees, just like a snake does to an innocent rabbit before using its fangs to eat it alive. I shuddered at the thought. This was a little creepy, even for me. I decided to go deeper into the jungle of vines. I slowly edged myself forwards. I had to jump over logs and fallen branches along the way. I was actually going pretty well so I decided to jog. I jogged for a bit but suddenly, I stopped dead. I had come across a tall old looking door. Carefully, I stepped towards it. It didn't look like anyone had opened it for years, maybe even centuries! Deciding that it was best to tell my friends, I set off for home.

When I got home, I decided that it was best to keep it a secret. So when Mum asked me what I had been doing, I decided to tell a little lie. I told her that I found a new tree and decided to climb it. I rushed up to my room as fast as I could. I had to make a call. First up, I called Tia as she was my best friend. This is how our conversation went.

"Ti! I have some very important news!"

"Sure you do. Like the time you said that you were going to die if I didn't hear it and all it was, was that you got the King Kanga plastic toy from your burger meal."

"No! Seriously! I have discovered a secret door in the woods! A real life secret magical door!"

"Okay! I believe you! Great! You must have seen a magical unicorn on the way. Oh! And don't even get me started on the flying pixies!"

Tia hangs up. Ahh! I just want to scream right now, but if I did, Mum would know that something was up. I don't understand why no one believes me! Okay, my last hope, Jack. One ring. Two rings. Three rings.

"Hello. This is Jack Reed speaking. Who may I ask is on the other side?"

"Oh, hi Jack. It's me, Molly. Tia doesn't believe me, but I swear that I am telling the truth! I decided to go to the outer woods and you will not believe what I saw! All of the trees were covered in thick vines and there was this old door and I think that it hasn't been opened for years and and and"

"Whoa! Slow down! I can hardly hear you!"

"Sorry. I was just so excited. So anyway, this door I found looks so magical! I just don't understand why Tia doesn't believe me! Wait. You believe me. Right?"

"Oh yeah. Right. Oh no! Ahh, Mum just called me for dinner. Gotta go. Bye!" And he hangs up. Oh well. If no one believes me, that's their problem.

The next day, I am not as happy as I was yesterday. My two best friends think I'm a liar and a crazy person. As I walk to school, I think about what could be inside that door. I think about what my friends said to me on the phone. This is going to be soo embarrassing. I jog up to the school gates exhausted and tired. As soon as I pass the school gates, I rush to class as quick as I can. Finally, I am actually early. I find Jack and Tia sitting at a bench. I decide to go talk to them.

"Hey," they say a bit unsurely, "what's up?"

"Oh hi, I just wanted to tell you that those things that I said on the phone were completely truthful. I swear that it was 100% NOT make believe."

"Really now?" Tia said with a smirk.

"Come on guys, why don't you believe me?"

"Well, when someone says that they found a 'magical' door in the woods, I have my doubts."

"Whoa, is it story time with Molly?" Oh boy. Lesley had been listening to our every word. This was about to get a whole lot messier.

"Lesley, this is none of your beeswax."

"Oh really then. I think that you are a liar." I look at Tia hopefully. Nope. She is too busy admiring her fingernails. Jack? Nope. He is just staring at the ground.

"Listen Lesley. I have proof. I am going to show Jack and Tia tomorrow afternoon. And with that, I grab my useless friends by the hand and drag them to class.

Oh! The days go by soo slowly! Finally, the end of day bell wakes me up and signals to me to go to the best place on earth – the woods. I slowly drag Jack and Tia into the forest of trees. Finally, after a long time of waiting about, we reach the door. Tia is gobsmacked. Jack is bewildered. I am, well, I am excited for the adventures that they meet. After a long time of waiting around and admiring the door, we knock. First up is Jack. He knocks three times – nothing. Tia. She knocks three times – nothing. Finally, it is my turn. I take a deep breath and knock three times. This time, a crack of light appears in the door. This crack turns into a hole. This hole turns into a cat flap. This is not an ordinary cat flap though; it is a cat flap big enough to fit the three of them if they crawled. Once we have all got through, a big board to their left appears and says THINK. Jack thinks of Candy-land, his dream come true. Sure enough, when he opens his eyes, we can all see candy canes spotting from the icing grass and marshmallow trees with chocolate trunks growing side by side along the melted chocolate river. There are gumdrop boulders by Sweet Tooth cave. Before you could say chocolate frogs, Jack had launches himself into the chocolate lake. Wow! This was amazing we all thought as we were stuffing our faces with gooey chocolate.

The next day at school, we had been bragging nonstop about our little discovery. Lesley Bullfrog had a cunning plan to sneak in, but little did he know that Molly was smart. She had made a password – Lesley Bullyfrog stinks!

Area 20

Highlights of the year 2019!

In Area 20 we have an amazing and wonderful teacher called Mr Stockley. On the first day of school I new I was was going to tell my mum and dad all about him and how wonderful he is. I had a great year with Mr Stockley. So if your looking for a teacher that has humor and enthusiasm then have Mr Stockley as your teacher. There are some of the most memorable things that I have done with Mr Stockley for 2019. ✓

Term 1

Student of the day

Student of the day was definitely a privilege. But we had to earn the privilege. Student of the day was a really fun privilege and competitive. So it's when Mr Stockley chooses utter best student who is working hard and doing the right things. Every end of the day Mr Stockley will announce the new student of the day. The student of the day gets to have a whole desk by themselves and they get to eat in class and bring a toy in class. But it mustn't distract the class. Then at the very end of the day you get a certificate signed by the principal and Mr Stockley. Some people got chosen twice and once. I was lucky enough to get it twice!

Classroom Jobs

Mr Stockley told us at the start of the year he said that in his class everyone has jobs. Because he can't do everything by himself, so he gave each of a job. My job was to check the iPad percentage, I didn't always do it, but I had to do it when NAPLAN was coming which was in term 3. It can't be below 90 percent. There were all different kind of jobs which was very smart of Mr Stockley because everyone was included and we all had responsibilities.

Birthday 🎂

Mr Stockley was definitely a different teacher out of all the teachers I have had for the past 6 years. Mr Stockley said that if it was someone's birthday then we go to pic collage and make different posters for the birthday girl/boy. Then he puts on the Stevie Wonder Happy Birthday song, which we need to sing along with. I thought it was one of highlight of the year because the other teachers that I hade didn't do that we just use to sing happy birthday.

Which isn't really fun or anything. But what Mr Stockley does is make you feel special.

You have had a wonderful year Shufei. ☺
I really like your self-reflection and responsibility
for your own learning. (Not quite sure when you
fitted everything in - with all that fun happening!)
MS McNeil . 6/12/19 ✓

Australian Authors

At the start of the year Mr Stockley told us about Australian Authors. But most of us didn't really know any Australian Authors only a few people did. So that's when Mr Stockley introduced us to Australian Authors. Each Thursdays we had to go do the library and get the Australian author that Mr Stockley tells us. He lets us read it for a week then he gives us an worksheet about the Author. At the End of term 1 we all new so many Australian Authors that we started to read some of them. And now I know a lot of new Australian Authors that I really enjoy reading their book.

Snail 🐌

Again at the start of the year Mr Stockley told us about the snail, he said that when ever it rains the snail it will move a bit. (But it's him that moves it when ever it rains) he said that this girl gave him 1000 snails. Mr Stockley that the snail moves soo slowly that you can't even see it move. I liked the snail because Mr Stockley would always talk about that makes me laugh and he makes up really funny excuses that makes the class and me laugh.

Humor

If you ask does Mr Stockley have a sense of humor then just think about he practically makes everyone in the class laugh about 5times a day or even more! So if your asking this question then your welcome. I've answered it nice and clearly. Mr Stockley is the type of teacher that has a lot of humor. And if he sees you having a tough or rough day then he'll just make you happy again with a big smile and he's done that to me before. He has made me laugh 50 times or even more. And I think my class too

The clam

The clam thing was also a really humour thing, and how it was really funny and very creative of Mr Stockley to do this thing. So it's basically when Mr Stockley Said the world clam in the middle of a sentence, then we have to put our hands in a 90 degree which is a right angle. This helped me with more of a under standing how much degree is a right angle. I thought it was funny how Mr Stockley was a actor and the boss told him he could be a clam and he can just put his hands in a 90 degree and just stand there I found it funny. Mr Stockley normal says clam in a middle in a sentence or in the middle of class. I normally don't do it so quickly I only do it when I see other people around me doing it the I do it myself.

Diary

Again at the start of the year Mr Stockley Said for each of us to buy a diary, because he wants us to be organised, so he told us each to buy a diary. He told us to buy a diary because we can write when homework are due or any important information to show our parents. I thought it was a highlight of the year because no other teacher has told me to buy a diary and write all the things like what Mr Stockley does. So thank you Mr Stockley for teaching me how to be organised using my diary!

Goals

Mr Stockley was a genius and made us write some goals for our selves, so then we can keep track on our goals. After a term Mr Stockley will then let us do a review on our goals to see our goals were successful or not. I thought it was a highlight of the year because no other of the year because teachers in the past have told me to right down goals but not a review on my goals to see if I actually successful in my goals or not. When Mr Stockley Said to right a review on my goals I was really surprised to see that I was quite successful in my goals.

Making our own choices

At the start of the Mr Stockley told us that we can make our own choices. Like spring something without being told. Or going to the toilet without telling him. Or read a book and not sit there and wait time. I thought it was a highlight of the year because when I had other teachers they said that I need to ask them if I can go to the toilet or do something like a piece of work sheet. And I couldn't do something without being told. So in Mr Stockley class I could be free and I couldn't make my own choices and now I'm free it was a dream come true!

Term 2

BBQ

In term 2 the class had a class bbq which was amazingly fun. But we couldn't get free lunches so we had to earn it. We had to get certain amount of points to do to the class party. 33 points to go, 50 for a soft drink, 75 for ice cream and 100 points for anything. I got up to 75 points which I thought it was pretty good. The highest was Avuya she got up to 100

points she could bring anything. I really enjoyed the class BBQ because none of the other teachers I have had a class bbq. And I enjoyed sending rolls to my old teacher that I use to have in year 3. Because once everyone finished we had to send rolls to teachers and I was lucky to get to send it to my old teacher.

STEM (bug catcher)

In term 2 Mr Stockley said that for term 2 we are going to be making a bug catcher project for the first stem project this year. We had to catch a bug and make sure it stays alive for a week. Sadly our bug didn't stay alive for a week but our bug catcher did attract bugs. We catch at least 4 bugs. Though I think me and my partner could of done a bit better in our bug catcher. I really enjoyed making the bug catcher and I thought it was pretty good for the first bug catcher and the first stem project.

Edu dance (practice)

Edu dance was really fun and really exciting too. But this year sadly I was in the third row. Normally I should be at the first row. But I still swapped to the front row while doing my dance. This year actually I did a wrong move while I swapped to the front row with lots and lots of people watching and it was the real dance. So that was really embarrassing but I still had lots and lots of fun. And I learnt a lot of different types of moves with the new dancing teacher thank you so much!

Swimming carnival

The swimming carnival was the first one in 7 years now. And since I was a year 5 I could go to the swimming carnival. It was really fun and extremely exciting. At the end of the swimming carnival we got a little present for the first swimming carnival in 7 years. It was really memorable. But sadly green didn't win, blue did. There were a lot competitive, and I would love to to another one. And I'm sure that green would win the next carnival.

Excursion

We had an excursion in term 2, the first one for the year. It was really interesting and cool. We went to the Bickley Observatory as our first excursion. Thank goodness it wasn't raining because my raincoat was a bit weird and I didn't want to get wet. At the Bickley Observatory

I learnt so many things like the order of it and how to remember it. And when the first meteorite was found. And so many others. But we had to split into groups of 4. We wrote a lot of notes down. I would love to take my family there and visit it too.

Relief teachers

In term 2 we had a relief teacher called Mr Burrow, he was the second relief teacher to arrive. He was really funny and fun. The best thing was how the year 4s made pikelets that was delicious, but the year 5s had to do another topic which was down the drain, even though it wasn't so fun, we got to eat the pikelets when the year 4s made them. It was a really fun experience with Mr Burrow and what he does! Thank you!

Extra sports

Extra sports was really fun but we had to earn it though. To earn the extra sports we had to get certain amount of points to get extra sports. I thought having extra sports was a fantastic idea. And we don't just get it when we don't deserve it. So it was nice how Mr Stockley said that we were going to get extra sports.

Term 3

Privilege badge competition

The privilege badge competition was really fun but competitive, only 15 lucky people get to start off with the badge. I sadly didn't get to start off with it. But I still had it in week 4 and then I kept it through the whole term. We had a lot of privileges we would always get 2 new ones a week. Mr Stockley says that it's easy to keep hold of it, but the hard bit is getting it. I agreed with Mr Stockley because I had to wait so long till I could get the badge!

Minecraft

Minecraft was the 3rd project for stem. We had to build a space colony that can be built onto the moon. I worked with Jasmine Zhou for my partner (year 4) we did a really good job. And I thought it was a huge success! I thought we did a good job because we included things that other people didn't include.

Art exhibition

The art exhibition was a fantastic idea and I'm very glad that my art was in. I drew a picture of a orange fire breathing dragon. I didn't go but I knew it would be fun. Mrs Jones was the fantastic teacher that thought of the great idea! and her class also helped. I thought it was a great idea so we can show off our art to people. It was held at the new under cover area at Willetton Primary school and thank you Mrs Jones for organizing this!

Naplan

Naplan wasn't fun but it was scary. I didn't really get good scores but I did better than year 3s Naplan. Which I thought it was pretty good. And I am improving a bit.

Term 4

Faction carnival

The faction carnival was soo fun this year. And it was a bit of a challenge. Though this year even though I didn't become girl champion or runner up I'm quite impressed. My faction still had victory! Green won yay! And ever body was very happy including me! This year everyone was trying very hard but everyone enjoyed themselves! I'm very glad I'm in green and GO GREEN!

Numeracy day

Numeracy day was fun because we went down to the year 3s and taught them how to add different sums together. I partnered up with Jasmin she showed me her activity which patterns she was really different. And what she showed me was quite different too. So thank you for showing me how to do your ways of doing it.

Secret Santa

Even though I wasn't in it I'm sure it would be as fun as it seems like. We had to buy a present for a person that only you knew. I thought it was a great idea to do and I would really enjoy it.

Party

We're having a class party in 2 weeks time. But we had to earn 875 467 points to have a class party. I thought we wouldn't get that many points but I was wrong we got it in 5 or 6 weeks which was pretty good and quite fast. But we have to wear a hat for our class party. We have to dance on it without making a sound and you can't touch anyone either. We have to dance in the song shake it off. And if your hat is off hen you have to sit in the corner. I thought it was a highlight for me because I haven't had a class party pretty long now.

Part hat

In term 4 we had to make a party hat so then we can enter the class party. It has to look fun and colorful. Mine is very fun and very colorful. This time we didn't have to do write up but normally we would. I enjoyed making the party hat and I hope next time I can do it again.

This year I had a fantastic year and I hope that next year I have an amazing teacher just like Mr Stockley. Thank you for giving me the best year ever and I loved experiencing all the things that you have done for Area 20! I enjoyed myself very much, Thank you!

By Shufei

Sensational/
Shufei
Well
done

Highlights of the year

Hayden, you have enjoyed a fun-filled, jam-packed year of learning! Lucky you!
Mental 6/12/19.

This year Mr Stockley has taught me quite a few lessons about behaviour and responsibility. 2019 has been the best year ever.

Term 1

Student Of The Day

Student of the day was fun because we had to behave and when we got student of the day you got to eat in class, have toys on your desk, have a pillow and a whole lot more. I got student of the day twice and it was exciting to see who would be student of the day. I would bring in chocolates and milkshakes, I would also bring a pillow, teddy and I loved going out of the class first, for recess, lunch and home time. Student of the day is an individual competition.

Australian Authors

Every 2 to 3 weeks Mr Stockley would gives an Australian author like Duncan Ball, Justin D'Ath, Emily Rodda, Paul Jennings, Gillian Rubinstein, Felice Arena, Libby Hathorn, Morris Gleitzman. All of the authors are interesting in their own ways. I really enjoyed the worksheets and activities we had to do after we read the book. My favourite book was Morris Gleitzman, Once because I always wanted to read that book. After I read it i wanted to read the whole series, I also knew more about the Nazis.

Jobs in Classroom

We all had jobs around the Classroom an some of them are really funny, like undoing a handshake, tallying all the marvellous and more. My job is chief counter because Mr Stockley "can't count". I think its really funny because, didn't he learn how to count in school?

When Mr Stockley offered who would want to be "chief counter" I was the first one to put my hand up and I got the job.

Snail

Mr Stockley had a girl in his class a long time ago and she made 1000 snails, after a while they "died". He still has one and it slowly moves around the room. When it rains, the snail moves faster and when it does move it leaves a invisible trail of goo/ slime on peoples work. It's really funny because he says it moves 1mm and people in our class say that it hadn't moved at all. I wonder then how does it move when mr Stockley is not here?

Silent sessions

I like silent sessions because its relaxing, it makes me calm and I get a lot done. We have two a day. Most of the time the length of the silent sessions are between 15 and 45 minutes. Sometimes when we are all quite we get really focused until Mr Stockley scares us all by talking loudly, he says "the silent session is over". It startles me every time.

Using diaries

Writing in my diary has helped me with organisation, planning work and working out what homework I need to do. At first I didn't know how to use a diary. Now I feel like I know a diary forwards, backwards and upside down. Diaries have been a big help this year, especially with time management. ✓

Classroom rules

We have 5 rules and we made them up at the star of the year. The one I need more work on is " my own belongings/behaviour is my own responsibility". I need more work on this one because I always ask for things like erasers, sharpeners, pens and pencils. The one I really like for everyone to do is " co-operate with each other and respect other peoples point of view". The reason why I like this is because if we don't co-operate and work together then we wont be a team, that has each other's backs. The rule that I think I am good at is " attempt to do new things and always try your hardest". I am good at this because when I want to do new things like netball, I put all my energy into it and enjoy it. ✓

Swimming carnival

We had a big carnival but it wasn't an ordinary carnival it was the swimming carnival! It was the first swimming carnival that Willetton primary has ever done. There was freestyle, backstroke and more. I came second in backstroke with sienna. There were different tabloids games like unicorn floaty race, pool noodle race and much more. In the end, my faction, blue won!! I was really proud of blue because it was our first time doing the swimming carnival and we won. ✓

Term 2

BBQ

We had to get 33 points to go to the barbecue and there were reasons why you earned the points. You have to get 50 points to bring a drink, 75 points ✓

to bring an ice cream and 100 points to bring anything you want. I ended up with 82 points, that meant I could bring a drink and an ice cream. There were parent helpers cooking the sausages, serving the hot dogs and buying the fresh baked rolls. We took a photo with the Principal and she wore my chef hat and took a photo that went on Willetton Got Talent. It was an amazing experience because I had never done any thing like this before.

Beat the tape

Beat the tape is a math game where you have you have to write down answers to the questions on the tape which is played on a recorder. At first it was really easy, but then it got harder and harder. It helped my mental maths, especially times table.

Dr spello

Dr Spello is a game where you write down 1 to 5 and then write the words next to the numbers. The words you write are on he board. The person at the front marks the words off. If they call all you five words you say "Doctor Spello, Mr Stockley you're the best teacher in the world!". Then the person at the rom tests you on the words. If you get them right then you win, but if you get them wrong, you have to keep playing. I like this game because it helps me with memorising words and how they are spelt. I had been dr spello four times, I like being out the front because people usually thinks I will pick the hard ones, but instead I pick the easy ones then go to the hard words thats how I stay up the front longer.

Extra sport

I like extra sport because we have to work hard for it (I like challenges). As there are no free lunches in Mr Stockley's room, we have to get a certain amount of points to have extra sport. Extra sport is where we get to have a vote on what we play and then we play what ever we for, for 30 or 45 mins. My favourite games are everything ball, dodgeball and golden child. I like everything ball because it kinda like softball and I used to play softball, so it was very easy to understand. I like dodgeball because I am very good at throwing, catching and aiming. I like golden child because it gets my basketball, netball and running skills up.

Puppet theatre

There was an Indonesian man that to our school and did an Indonesian puppet show. He used puppets that were made from buffalo skin. They can come in all shapes and sizes. An interesting thing about the puppet show, was that you couldn't see the colour of the puppets only a shadow of them. He told us the story of rama and Sinta. The story is about Sinta gets taken away by the demon king Rahwana and he wants to marry Sinta, but rama and his guards help take Sinta back so they can have a happy life again.

Term 3

Privilege Badge

What is a privilege badge? You might ask, well its where a competition where 15 people get a badge and they get certain privileges such as, eating in class, going first at recess, lunch and home time, having a foot stool, bring a pillow and more. I got the badge and then lost it and got it back again. I like this because we have to work harder than ever and I did that.

Histaringo

Histaringo is like a bingo, but with spelling. First you draw a 4x4 square and write 12 words in the boxes. When you get four in a row you shout out "Histaringo!", then you get tested on the 4 in a row words, if if you get them right you stand on the chair and say "clean your slates!". It's a really fun game because you don't know what's going to happen.

Space Colony

In term 3, we made a space colony on Minecraft. My partner was Porshia. We first planned our space colony, the bedrooms, kitchen, gym, lab, disco room, telescope room, office, storage room, air room, farm, and plant room. Then we began to build the walls for each room, after we built the walls we started making the rooms. After we had done all the details and furniture, we started working on the SPARC worksheets. We handed it on time and with lots of detail. I enjoyed this experience because I didn't know what Minecraft was and now I am a pro at it. This is because Porshia helped me. It was fun working on this space colony because it got me thinking about the possibilities and also it was interesting adding and taking away things.

Bickley Observatory

We went on a excursion with the year 4s and went to a place where they showed us the different planets, telescopes and meteorites. There were different stations like planets in order, sun goes around the Earth, telescopes, meteorites and more. It was exciting and interesting. After, we went to the

Bickley Observatory, we did a long report on what happened and what we liked about the excursion.

Term 4

Faction carnival

We had a faction carnival and i was in division 4, leaderball, flag race and throws. We came first in leaderball, I came second in throws and we came third in flag race. Over all it was so much fun. I especially liked the tabloids. There was obstacle course, tunnel ball, multi pass ball and sack race. In the end blue came third, again. Red came last, gold came second and green came first, again.

Inter school

I was selected to compete in inter school athletics because I came second in throws and first in leaderball. We were up against Burrendah, Rostrata and West Leeming primary schools. For throws I came second for throws, we came third for leaderball and for passball we came first! Unfortunately Willetton Primary came last overall, but it was really exciting for two reasons, one because it was my first time at inter school and two because it was fun going against other schools and getting to know them a bit better.

Class Party

Mr Stockley said we had to get 875 476 points to have a class party. When we achieved that, we started planning what to bring and when it is. After we figured that out the party committee made a letter to send home to parents. We also have to make a party hat made out of everyday junk. We have to dance with our hats on and if they come off we're out. We have to dance to "shake it off" by Taylor swift. It's going to be so exciting.

Overall this year has been a fantastic year. Mr stockley has taught quite a few lessons about time management, behaviour and have a laugh everyday. Mr Stockley has been the best teacher ever. I am so thankful I was put in his class this year.

Thank you so much Mr Stockley

By Hayden Porter

Well Done

Highlights of the year

By Jasmine Zhou

This year we had Mr Stockley as our teacher. We got to do lots of different and fun activities with him throughout this year. He was also telling lots of jokes to make us laugh and it was very funny. He also has a shocking memory and can't count by ones and for some reason and when we say a small number he always reckons it's a big number and when we say a big number he reckons we said a small number. I think Mr Stockley is a very good teacher to have and I think he is the best teacher I've ever had!

Term 1

In term 1 at the start of the year Mr Stockley told us about habits of the mind. They were finding humour and being accurate and precise in work. Finding humour was very easy since he was telling us funny jokes everyday like for the snail he kept on telling us that it was real when it was just a drawing and that he got his ears syringed every October. Being accurate and precise was a lot harder. We had to go back and check our work to see if there were any details left out. We also had to put in lots of effort and put in lots of adjectives so that the reader could picture it in their head while reading it.

The second highlight I chose in term one was the "student of the day" competition. Student of the day is a competition where you have to be very good and at the end of the day if you're still in first place in Mr Stockley's head then you get to be student of the day for the next day. If you are student of the day you get to bring in food and a soft drink to class and eat it whenever you want unless it's a giant cheesecake Mr Stockley says. You can also bring a cushion or stool in to put your feet on or to sit on. You also get a table all to yourself at the back of the room and when someone walks in the classroom they see the sign on the student of the day desk. I got student of the day twice this term, once earlier on the term and the other time on the last day of the competition.

Jasmine, what a wonderful, fun-filled, exciting and stimulating year you have had. Congratulations on all you achieved throughout Year 4.
M. J. L. 6/12/19.

Also in term one Mr Stockley encouraged us to read books written by Australian authors. We read Duncan Ball, Justin D'ath, Emily Rodda, Paul Jennings, Jackey French, Gillian Rubinstein, Felice Arena, Libby Hathorn and Morris Gleitzman. I liked all of their books but my favourite ones have to be the Paul Jennings books or the Morris Gleitzman books because both of them were really funny and intriguing. Mr Stockley says that most stories have been set in the sandpit but he's just being funny.

Another highlight in term one was making the bug catcher. We had to design and make a bug catcher made of everyday objects. The catcher has to catch the bug without harming it. The bug will then have to stay alive in the catcher for five days in the catcher. We got into groups of three to do this, my group had Elaine and Maheeka in it. After finishing it Maheeka took it to her house to test it out and we caught a bug on the second day! Here is the catcher me and my group made:

My last highlight for term one was finishing the year 4 Mathletics program. I didn't expect myself to finish so early on in the year, especially with 162 activities to do and I was very surprised. There are still seven people in year 4 who haven't finished and it's already in term 4 I also went on to do four more programs, the year 5 New Zealand program in term 2, the year 5 Singapore program in term 3, the year five England program in term 4 and last of all the year 5 Canada program in term 4 too! and I'm currently doing the year 6 England program. Now I have done five sets of Mathletics and I think that I have done the most Mathletics in the class.

Term 2

My first highlight in term 2 was getting my pen license. I was the first person in the class to get it. Your letters have to sit in the line and there has to be triangles between the letters to get your pen license. Mr Stockley's goal was for everyone to get a pen license and he accomplished it and everyone got one. When you get a pen license you can write in pen whenever you want but he can take the pen license away from you too. If your letters still haven't got tidy enough, don't have triangles between the letters or can't sit on the line still he can take it away from you. No one has got their pen license taken away from them yet this year which is good.

We also did a iMaths investigation called "Plenty of Pikelets". This investigation was very different from other iMaths investigations because it involved cooking in it. Mr Burrow our visiting teacher helped us for cooking pikelets. On the day of cooking the pikelets all the year 4s and Mr Burrow dressed up in aprons and silly hats(actually chef hats) and went to the conference room to cook. The pikelets were very yummy and after we cooked them and I got to taste one first. We put lemon juice and sugar on them too so they were tasty. We also had to cook some pikelets for the year 5s too. This was a great experience for me because I've never cooked anything before or mixed the ingredients before and this was very fun for me.

The class barbecue was my favourite thing in term 2. You have to score 33 points to go, 50 to bring a soft drink, 75 to bring an ice cream and 100 to bring a mystery item of your own choice. I got 53 points which means I get to go to the barbecue and bring a soft drink. All of the class got to go, most of the class got to bring a soft drink, some of the class got to bring in an ice cream and only two of the people in the class (Amrut and Porshia) got to bring a mystery item of their own choice. To get those points you need to be good, work hard, answer a lot of questions in class and do lots of Mathletics and Reading Eggspress. It was my first time having a class barbecue and I was really excited about it. Everyone had to bring sausages in and there also had to be about 4 parent helpers. We also brought some sausages to the teachers around the school.

Making the moon jalopy was another highlight too. We had to design and create a moon jalopy that could move by itself. We worked together in table groups but we still had to make our own jalopies. My moon jalopy's wheels were made out of plastic bottle lids so it made it hard to move in a straight line along the ramp. It was still very fun because I love technology projects and making stuff. Here is my moon jalopy:

Term 3

My favourite highlight of the year was probably the privilege badge competition. There's this badge that you wear and when you have the badge you get all sorts of privileges. It's kind of like student of the day but you get more privileges and 15 people have the badge instead of one. There were 26 people in the class this year which meant some people didn't have the badge so they had to wait in 16th, 17th and 18th position to get it. A badge is lost when the person holding it does something wrong like they didn't hand their homework in time or got on community service, then they lose the badge and it gets handed to the 16th person in line. Sometimes people don't lose the badge for the whole length of the competition and if that happens then they get to be the first person at the table at the class party in term 4. I was one of the people who never lost the badge so I get to be one of the first people at the table for the class party.

Another one of my favourites was doing the space colony on Minecraft Education. We got in pairs and we had to build a space colony, my space colony had 6 bedrooms, 6 bathrooms, 3 dining rooms, 1 kitchen, 1 lab, 1 water tank, 1 conference room, 1 gymnasium and a dump. There was also a garden, 2 rocket ships and a livestock farm outside. There was another place where astronauts could live that had 3 bedrooms, 1 bathroom, 1 conference room and a dining room. Since there wasn't any furniture we had to use different blocks that looked like the furniture. For example a chair might be stairs and a table might be a fence with carpet on it. ✓

The last highlight in term 3 for me was parent night. It's when your parents can come in your classroom and you show them all the work you done this year. This year Mr Stockley asked us to do tags for our work around the room. You had to point out all of your tags in exactly 27 seconds or else you'll lose the badge if you have one. On parent night I showed my mum all the pieces of work around the room and my Minecraft space colony on my iPad. I really enjoyed the time and it's a great opportunity to show how much you've done this year.

Term 4

My first highlight in term 4 was the iMaths surfboard. We had to design a surfboard, snowboard or skateboard. $\frac{3}{4}$ (three quarters) had to have design and $\frac{1}{4}$ (one quarter) had to be one solid colour. I chose a surfboard. I really liked the design for my surfboard and the colours were very vibrant. My surfboard I chose met all of the expectations needed and it was a very good surfboard in my opinion.

Getting into PEAC (Primary Extension And Challenge) was very hard. Only 10 people got into PEAC this year and there was two from our class (me and Amrut). Mr Stockley said that you have to score over 96% which means you can't get any wrong and it's very hard to get none wrong because sometimes you make stupid silly mistakes (SSMs). Mr Stockley said he was very confident but my mum doubted that I would get in. I didn't expect to get in but I did and I was very surprised when I did.

The colour run was a great thing to do. Firstly you have to prepare a white T-shirt to wear when it's your grade's time to run. We have to wear a white T-shirt because the colour powder is too hard to get off and you have to use bleach to get it off but when you use bleach it also starts to rub away the actual colours on your uniform. When it's your grade's time you have 10 minutes to do as many laps around parklands as you can and after that you get sprayed with coloured powder. It's super colourful and I got a very colourful T-shirt in the end. It's also a great event and a great fundraiser to hold. I really hope that they're doing it again next year.

Last of all this year we also had a class party but to go we had to make a party hat that was fun and colourful. Mr Stockley also appointed Connor a job that when we line up outside the classroom for the party he asks a stupid question "have you got a party hat on?". This year everyone made a party so everyone gets to go to the party. I can't wait to go to the party!

This year has nearly come to an end. I had a wonderful time here and the activities were really nice. It's sad to leave this classroom but it's another opportunity to meet different people, see what other teachers are like and make new friends. I really hope that next year's teacher is just as good as Mr Stockley.

Well
written
Jasmine.

Congratulations on such a full-filling year Levi.
You have obviously loved all of Year 4. *6/12/19.*

Highlights Of The Year By Levi Seah 2019

Term 1:

I had no other teacher like this. It was Mr Stockly^e. When I walked in the room the room was big. This was different for me because I had never had a male teacher. He says boys sit next to girls because they have different ideas. So I thought Mr Stockly would have different ideas to.

At the start we made up the rules. The rules are suppose to reduce chaos, which it did. It was good so I could hear what people were saying because one of the rules were no fiddling/talking while someone was speaking. It means there is no background noise.

He has silent sessions, it means complete silence and nobody can get out of their seat. It is easy for me to concentrate and relax during silent sessions. Nobody will ask me for equipment that they don't have. He also gives us time to prepare for it and gives a warning that it is going to happen. I think having silent sessions are good because we get a lot of work done. If we had the same amount of time but without a silent session we would get more work done in the silent session.

We read our first Australian author. It was Duncan Ball. He wrote the Selby books. He gave us 2 weeks to read each book. It increased my reading skills from reading all those books. He gave us a sheet after we read the book to do comprehension.

We got extra sport. We had to earn points to earn extra sport. Once it was only 1 point but sometimes it can be a lot of points. This was a class competition. It happens a few times each term. The extra sport goes for half an hour.

Next, we got to do student of the day. You could get it 1 or 2 times. I got it 1 time. We got to sit at a special desk that says "student of the day". We have privileges like eating food in class, bringing in a toy and also you can get a stool for your feet to rest on.

I really liked getting a printer in the classroom. I liked it because we didn't have to go to another class to collect our printed out paper. The printer was called the Ishan. It was named the Ishan because he was the first to use it. It could also photo copy stuff too.

He talked to us about the clam. He said he use to be an actor and every time they said clam he would have to do a 90 degrees angle with his arms to the

Levi

right. So when he says clam to us we have to do the same. He does it for fun or to see if your listening. I thought that was really fun this year but watch out and be listening if he says clam.

We made a bug catcher. My bug catcher did not work although we got a bug in it. The bug was an ant. We put honey and maple syrup but it was to sticky and the ant got stuck. That is the reason why it died. I think we could of put something that is not sticky.

I liked Doctor Spello. To play Dr Spello you use some words and something to tick the words. So you write five words. Who ever is the first one to get there 5 words first wins, but you have to spell the words you wrote down. If you got them wrong carry on with the game until someone gets the words correct.

We made a chart. We each had a name tag. We put it on comments like helping each other out, trying hard but there are negative ones too like not listening. Each comment has a number. We record the number next to the person's name.

We did school swimming and I passed level 8. It was a highlight for me this year because now I am in level 9. My technique was good. It was fun swimming.

He gave us all jobs, my job was telling Mr Stockly off for eating candy, lollies and chocolate. I only let him eat it when it is somebody's birthday. After I say Mr Stockly you can't eat that your on a diet, he gives the sweet to me or someone else.

We sang the Beatles for birthdays. We also got PicCollage out and put happy birthday stuff on it. We hold it up when the Beatles say happy birthday.

He taught us about finding humour each day. He said having a bit of humour everyday is good. Some teachers are a bit too serious but Mr Stockly is different because he has a joke sometimes. He likes to balance it up with half serious and half humours. I think that is good that we a laugh a bit each day.

Term 2:

We got a new coding app called Tynker. Tynker is like Scratch 2 but on the iPad. You can publish your work, which means other people can play it. They can like it too. Tynker is cool because you can code really cool stuff. You can not get Tynker on the Apple Macs. It is good because we can just do coding on the iPad. We don't have to wait to Tuesday for the Apple Macs.

Levi

We had a relief teacher called Mr Burro. We did raffles. I won a pen from the raffle. We made pikelets. We got to do the reasoning and reporting but before that we got to eat the pikelets! We put a little too much lemon. It was the best investigation all year! I had never tasted pikelets before. I have only tasted pancakes. I did not even know about pikelets. We always make a card for when a helper leaves to say thank you. ✓

We also had a BBQ. It was 33 points to go to the BBQ, 50 to get to get a soft drink and 75 for an ice cream. I got to 50 points. This is a picture of me and my friends at the BBQ. I had a lot of fun. I really enjoyed the BBQ because I got to eat lunch with my friends and we got soft drinks.

He taught us about ssm's which stands for silly stupid mistakes. We have to try to avoid ssm's (silly stupid mistakes). To avoid them you go back and check at the end. He said we have to get to bed early before the days with tests so we do not make ssm's. Don't do tests too fast or you will make careless mistakes. Mr Stockly said mistakes cost you.

We had a snakes and ladders mat. Every time we met together on that mat we brought a red pen, a diary and whatever subject you are doing. We always meet there so we don't disturb the year 5's.

We watched BTN, BTN stands for Behind The News. It helps you learn *fast*. It gives you information about what's happening in the world ,like bushfires, democracies and more. It is helpful for you to know things happening in life. BTN was awesome because it told us a lot of information.

We played beat the tape. Which is he tells you number sums and gives you some time to think. After you answer it. There are 20 questions. If you get 20 out of 20 you beat the tape. ✓

Levi

I did coding. In coding you build stuff. You code things like dash and dot and Scratch 2. Coding is for free but there is a certain amount of people who can go. I made it into coding. I really liked coding this year. It is good because coding gives me advantages when we are doing coding in class. I have a Scratch 2 coding book which helps me.

Mr Stockly puts our work around the room. He shows our work to other teachers. I was proud of my work when it was shown to another teacher. My narrative was called 'Aliens On The Moon'. It got shown to the other teacher. It was the longest narrative I ever wrote of this whole year! That was a big achievement for me.

We made a moon buggy that moves by itself. My one did not work. I had a good idea though. My idea was I put a magnet on the buggy and move it with the magnet. The magnet was not strong enough to pull the buggy. If I had a better magnet it would of been good.

Term 3:

We had a badge competition. I held on to the badge for so long. The badge competition was like student of the day but with 16 of them. There was 16 badges. The privileges goes up by 2 every week. The privileges got better and better and better! It was so awesome. The weeks got better every time. The competition ended in week 9 on Friday. In week 9 you got 18 privileges.

We did Mr Ringo. It is kind of like Dr Spello. To play you need to make a grid. Get some counters. If you get four in a row you win. You need to write words too. It is fun and helped with spelling. It is good when Mr Stockly makes learning fun.

We did cross country. I came 16th. I sprinted at the end to get 2 places forward. It was tiring running all that way but I think it was challenging. It got me fit and healthy.

We did Minecraft Education to make a Space Colony. I paired up with Liam to do it. It worked very well for me because we had beds, a disco oxygen tank and a Lab. The space colony had trees to make oxygen for the tank. We had food and plants. I think maybe chickens for eggs. We did the floor grey to make it look like the moon.

We had the science incursion with a big black dome. It came in the new undercover area. We had a look at the Milky Way. I learnt why the Milky Way is called the Milky Way. It is because the Milky Way looks like milk is poured over it.

Levi

We did edu dance. Our song was Do Your Thing. You get some free dance at the start. We were dressed up as teachers. I like the end because we had enough teaching and we pretended to faint.

We had open night, my mum and dad came. We needed at least 8 tags up. I had tags in my book and up around the room. I had 9 tags up. They saw all my work. Some of the work I showed to them got showed to the teacher. I saw my little brothers work and my little sisters work too.

We coloured in feathers (they were made out of paper) and made 2 big wings. It was really cool. The other classes did it too. We each got a photo with it.

We did book week. I was dressed up as a lego man. We did an assembly where we go up on the stage and show what we were dressed up as.

Term 4:

We had the faction carnival. I was in division 2 for red. I was in tabloids group 2. My favourite was the sack race. I got the thing where you throw it up and catch it in the cup on my first try in practise. In the multiple pass ball we did the rainbow ball which means you can pass it however you want.

We did maths week where we show a different year what we do. Our class showed the year 3's. We showed the year 3's today's number. So they say any number. We each had a partner. My partner was my neighbour. They have to think as many number sums in one minute that equals the number they chose. After they have to try to beat how many sums they had.

We watched cat videos on Fridays assembly's or events. It is a funny video of cats. It runs from the start of school until the second bell goes. It is so funny to watch cat videos. Watching videos is very different from the other teachers I've had.

On the day before 11th of the 11th, we made poppies for Remembrance Day. It was fun making poppies. We also made a cross that says "LEST WE FORGET". We put them outside our classroom near Parklands.

We had the Colour Run. We did obstacle courses. We got timed for ten minutes. I liked the colour bit where we go up and down while people are

Levi

squirting colours. I came out all colourful. We also got to eat in parklands with our friends and family.

We got enough points to do the class party. We finished earning our points on week 6 on Thursday. It was hard to get 874,476 points. I am looking forward to the party in a few weeks time. We are doing a Secret Santa. I have never had a Secret Santa before. We did a raffle for it to choose who we are buying for. It was challenging for the price range, the price range was \$7.96 to \$9.08. We put up a small Christmas tree. I think it is fun and a little bit different.

I have really enjoyed year 4 with Mr Stockly in Area 20. It has been so much fun and so much learning but I really think I have progressed since the beginning of the year. I will walk out of the classroom on the last day a much smarter person than before. Thank you Mr Stockly for all your advice and all your teaching.

The End

✓
Well
done

Spooky Stories

By Area 6

The Spooky Halloween

Amazing, brilliant,
clever, SUPER DUPER
writing Tyler! ☺
Ms McNeil.

I was walking to a shop at 3:00 AM in the early morning to buy some milk. Suddenly I heard a spooky sound, I could feel another set of eyes watching me! I followed the sound and saw a Deserted Museum that looked very dark and haunted. I felt spooked but I was brave and discovered it.

I felt a lot of big, black bats fluttering around my face which made it hard to see and easy to trip over. Then I saw a wicked witch that was spawning a lot of bats. I tripped because of the bats that she spawned, I couldn't get up.

Next she got even more powerful because now she was spawning different types of insects and bats. After I saw a creepy, old hole, I ran through all the spooky creatures like spiders and cockroaches and went in the dusty, dirty hole.

Suddenly I went through the hole but the hole led me to a bunch of silky wet webs and the bats were still fluttering on my smooth face. I ran through all the silky webs and into a room that was empty. I searched and searched for a secret exit.

I found a big humongous pathway that was dusty. I went through it when I saw a flash of light which led to my house and told my family all about it.

I felt very spooked out but happy because I found my way home by myself.

By: Tyler

Scary, frightening, funny,
clever and entertaining writing Vasi! :)
the Mental

THE OLD SPOOKY ABANDONED HOUSE

Behind the door, I heard endless tapping. I was so scared to open the door, when I opened the door... It was an old man, an evil old man he had disgusting face, shirt, pants and hands.

He said he lived in this Abandoned, old house. He was really really evil that he made the light fuse and he turned invisible. Suddenly he was right next to me with his pointy, long, sharp, nose

After that the old man got me because I got distracted. Suddenly he got me again because I turned around and he was really really angry that he broke the sparkly silver fridge and all the fruits and vegetables fell out.

At last the old man ran away because I scared him so badly I was so scared because there was a spider was on me I flicked it but before I flicked it it bit me. I can't wait to buy a new house!!!!!!

By Vasi

The Spooky Story

Exciting, scary, tricky,
clever and funny writing Will!
Ms McAlal ☺

When I was walking home from the haunted bus stop, I found I was walking down a dark path and saw a run down castle, it was a grey castle and all the windows were smashed. So I went into the haunted castle, It was dark and I could hear noises coming from the top floor.

When I thundered in the run down castle, I saw a dark spooky shadow and I turned around and saw a GHOST! So I sprinted down the hall with a ghost chasing me. He had black eyes and white skin so he was almost invisible! When I was sprinted down the hall, the top floor tumbled on top of me so I was trapped. Luckily I found the attic door so I climbed up there. When I finally got up there I found some very valuable objects that were worth millions of dollars. Luckily the ghost did not follow me up there.

Just after that I remembered I had seen them somewhere. It took 20 minutes but I finally cracked it because I had been to Taj's house before and he showed me his valuable objects. IT WAS ALL A TRICK!!!, it was my friend Taj so he ran as fast as he could and escaped which is lucky for him. Then the sun came out and I caught him caught him red handed because I saw him setting up the sound effects.

By will
